UK-Israel Medical Science Seminar Series

Professor David H Rowitch

Selective neuronal vulnerability in development and disease

David H Rowitch MD ScD FMedSci FRS is a Professor of Paediatrics, University of Cambridge and Deputy Director for Research, Cedars-Sinai Guerin Children's. His research contributes to developmental glial biology and treatment of white matter diseases. The Seminar will cover findings from the Rowitch lab on the extraordinary vulnerability of Cux2+ upper cortical layer neurons and their progenitors.

Wednesday 3th December

5 pm Tel Aviv time
