Data are denoted as number positive/number tested.

Abbreviations used in this report:

ELISA=enzyme linked immunosorbent assay, MICR=microscopy, MACRO= macroscopic observation IFA= immunofluorescence assay, MFI=multiplex fluorescent immunoassay, CULT=culture, PATH=gross pathology, PCR=polymerase chain reaction, HIST=histopathology, NT=not tested, CR RADS=Charles River, TAU=Tel Aviv University.

## **Tests were performed by Charles River Laboratory & Sentinel Diagnostic Laboratory at Tel Aviv University**

### **Health monitoring summary**

**Serology:** The tested rat was negative for all viruses.

**Bacteriology:** The tested rat was positive for *Staphylococcus aureus*.

\*We consider the bacteriology mice samples positive for *Helicobacter spp.*

**Parasitology:** The tested rat was negative for pinworms and fur mites.

**Pathology:** No pathology lesions.

NOTE: Viridans group alpha *Streptococcus*, coagulase negative *Staphylococcus sp.*, *Enterococcus sp.*, *Lactobacillus sp.*, *Lactococcus sp.*, and *Escherichia coli* are all common components of the micro flora. *Trichomonas*, *Chilomastix* and *Entamoeba* are all common of micro fauna.
