SPECIAL CARE CENTER

Facilities & Equipment

Dental patients with special needs often find it difficult, if not impossible, to find a dentist who can deal with their unique requirements. Special needs may include physical or developmental disabilities, as well as cognitive or emotional difficulties. People with complex medical conditions also require specialized dental care.

If appropriate care is not available, unresolved minor dental problems may quickly spiral into full-blown crises. Dental issues – whether minor or more serious – may cause unnecessary pain and suffering for a special needs patient who has no access to a solution.

Our Special Care Center will reach out to special needs children and adults and offer much-needed, comprehensive dental care.

Complete with nine treatment rooms, and two operating rooms to treat patients under general anesthesia, the Special Care Center will provide expert dental care to those who need it most.

Specially-adapted treatment rooms will be equipped with the most up-to-date facilities - including innovative digital dentistry technology - enabling treatments to be completed more quickly and efficiently, and in fewer visits.

Israel's neediest citizens will finally have access top-quality dental care, resulting in a much-improved quality of life.

Supervised by Tel Aviv University Dental School professors and teachers, the Special Care Center will also allow senior students and young dentists to gain unique and valuable expertise working with the special needs population, honing their skills and contributing to ongoing research in the field of special needs dentistry.

Special Care Center Funding Opportunities

- Treatment Rooms
- Surgical Wing with General Anesthesia Facilities
- Treatment Unit for Dental Anxiety
- Specialized Equipment for Special Needs
- Children's Waiting Area
- Fully Accessible Entrance
